4. Printer Features

This chapter explains various items of **[Printer Features]** available in this machine.

List/Test Print

This section describes various items of **[List / Test Print]** under **[Printer Features]**.

Default settings are shown in **bold type**.

This is an item relating to the test print, such as for printing a system setup list, etc. If you change settings related to printing or the machine's operating environment, we recommend you print a settings list for reference.

All the printable characters and font types can also be printed for checking.

❖ Multiple Lists

You can print the configuration page and error log.

❖ Configuration Page

You can print the machine's current configuration values.

❖ Error Log

You can print error logs listing all errors that occurred during printing. The most recent 50 errors are stored in the error log. If a new error is added when there are 50 errors already stored, the oldest error is deleted. However, if the oldest error belongs to one of the following print jobs, it is not deleted. The error is stored separately until the number of those errors reaches 30.

The error history is printed only if there are errors to report. A confirmation message appears in the control section.

❖ Menu List

You can print a Menu List showing the machine's function menus.

❖ PCL Configuration / Font Page

You can print the current configuration and installed PCL font list.

❖ PS Configuration / Font Page

To search from LDAP server, it is necessary to register the LDAP server in **[System Settings]** and set **[LDAP Search]** to **[On]**.

❖ **TWAIN Standby Time**

When the machine is being used to send e-mail or a file, or functioning as Document Server or a network delivery scanner, a scanning request to the machine as a TWAIN scanner will switch the machine to the network TWAIN scanner function. This setting determines the delay until the machine switches to the network TWAIN scanner function.

• **Set Time: 10 second(s)**

When **[Set Time]** is selected, you can enter the delay time with the number keys (3-30 seconds). The machine will switch to the network TWAIN scanner function when the time set here passes after the last key operation.

Scan Settings

This section describes various items of **[Scan Settings]** under **[Scanner Features]**. Default settings are shown in **bold type**.

❖ **Wait Time for Next Orig.: Exposure Glass**

When dividing originals and scanning them individually with the exposure glass to form a single file, select **[Continuous Wait]**, **[Off]**, or **[Set Wait Time]** for the waiting status.

- Continuous Wait
- Off
- **Set Wait Time: 60 second(s)**

If you select **[SADF]** in **[Original Feed Type]** on the Scan to Folder screen, the **[Wait Time for Next Orig.: Exposure Glass]** setting becomes invalid.

If you select **[Batch]** in **[Original Feed Type]** on the Scan to Folder screen, the **[Wait Time for Next Orig.: Exposure Glass]** setting becomes invalid, and the machine waits for an additional original to be put in place.

If **[Set Wait Time]** is selected, enter the wait time in seconds (3-999) for placing additional originals with the number keys. Scanning will start if additional originals are placed and the **[Start]** key is pressed within this time. You can end scanning and begin transmission by pressing the **[#]** key within this time. Once the specified time has elapsed, transmission starts automatically.

If **[Continuous Wait]** is selected, the machine will wait for additional originals until the **[#]** key is pressed. Scanning will start when additional originals are placed and the **[Start]** key is pressed. You can end scanning and begin sending by pressing the **[#]** key.

If originals are placed in the auto document feeder (ADF), transmission will start without waiting for additional originals after all originals in the ADF have been scanned, regardless of the specified settings.

If a paper misfeed occurs or any of the following operations is performed while the machine is waiting for additional originals, the countdown stops and does not start again until the **[#]** key is pressed.

- Changing the settings such as the scan settings
- Opening the upper cover of the ADF
- Pressing the **[Interrupt]** key to activate the copy mode

❖ Wait Time for Next Original(s): SADF

When dividing originals and scanning them separately with the ADF to form a single file, select **[Set Wait Time]** or **[Continuous Wait]** for the waiting status.

- Continuous Wait
- **Set Wait Time: 60 second(s)**

This setting is valid if **[SADF]** is specified for **[Original Feed Type]** when scanning.

If **[Set Wait Time]** is selected, enter the wait time in seconds (3-999) for placing additional originals with the number keys. Scanning will start automatically if additional originals are placed within this time. You can end scanning and begin transmission by pressing the **[#]** key within this time. Once the specified time has elapsed, transmission starts automatically.

If **[Continuous Wait]** is selected, the machine will wait for the additional originals until the **[#]** key is pressed. Scanning will start when additional originals are placed and the **[Start]** key is pressed. You can end scanning and begin sending by pressing the **[#]** key.

Even if originals are placed on the exposure glass, the machine will operate according to the specified settings. However, every time originals are placed on the exposure glass, you must press the **[Start]** key to start scanning. Scanning will start if additional originals are placed and the **[Start]** key is pressed within this time. You can end scanning and begin transmission by pressing the **[#]** key within this time. Once the specified time has elapsed, transmission starts automatically.

If originals are placed in the auto document feeder (ADF), transmission will start without waiting for additional originals after all originals in the ADF have been scanned, regardless of the specified settings.

If a paper misfeed occurs or any of the following operations is performed while the machine is waiting for additional originals, the countdown stops and does not start again until the **[#]** key is pressed.

Compression reduces the time required for transferring the scan file. The actual time required for file transfer will vary depending on the file size and network load.

❖ **Compression (Gray Scale)**

Specify whether or not to compress multi-level (grayscale) scan files.

- **On: Compression Level 3**
- Off

If you select **[On]**, you can specify the compression level between one and five. The image quality is better for lower compression, but the time required for file transfer increases accordingly.

The actual time required for file transfer will vary depending on the file size and network load.

❖ **Max. E-mail Size**

Select whether or not to limit the size of an e-mail to which an image is attached.

- **On: 2048 KB**
- Off

When **[On]** is selected, enter the size limit (128-102400 KB) with the number keys.

When the SMTP limits the size, match that setting.

❖ **Divide & Send E-mail**

This function is effective only when **[On]** is selected for **[Max. E-mail Size]**. Select whether or not an image exceeding the size specified in **[Max. E-mail Size]** should be divided and sent using more than one e-mail.

- **Yes (per Max. Size)**
- Yes (per Page)
- No

When **[Yes (per Max. Size)]** is selected, enter the Max. Number of Divisions (2-500) with the number keys.

When **[Multi-page: TIFF]** or **[Multi-page: PDF]** is selected for **[File Type]**, the image will not be divided even if **[Yes (per Page)]** is selected.

When **[Yes (per Max. Size)]** is selected, some received files may not be able to be restored, depending on the type of e-mail software.

When **[No]** is selected, the e-mail is not sent if its size exceeds the limit, and an error message appears. The scan file is discarded.

Set the maximum e-mail size within the capacity of the SMTP server.

6. Registering Addresses and Users for Scanner Functions

Following describes the procedure for registering the destination and the user.

Address Book

Registering information such as the names of users and their e-mail addresses in the Address Book allows you to manage them easily.

❗ Important

- ❑ Address Book data is stored on the hard disk. It can be lost if there is some kind of hard disk failure. The manufacturer shall not be responsible for any damages resulting data loss.

You can register and manage the following items in the Address Book:

❖ Names

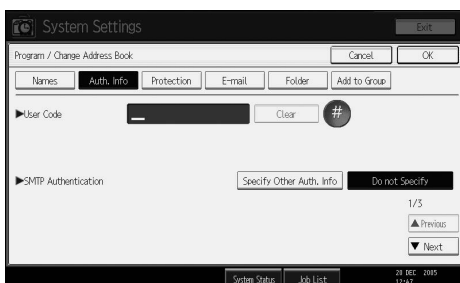

You can register the name of the user and the key display. This is the basic information required for managing user of the machine.

To register e-mail address in the address book, you must register information such as the user name and destination name in advance.

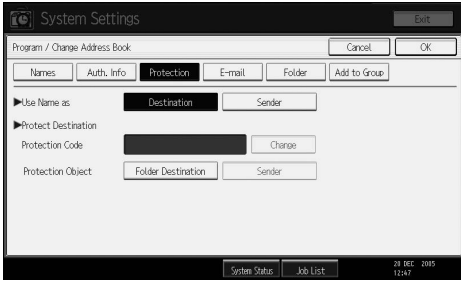

❖ Auth. Info

You can register user codes in order to restrict particular functions to certain users, and to check their use of each function. You can also register login user names and login passwords to be used when sending e-mail, sending to folders, or accessing an LDAP server.

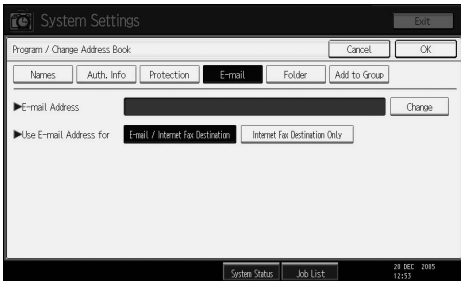

❖ **Protection**

You can set protection codes to stop sender's name from being used or folders from being accessed without authorization.

❖ **E-mail Address**

You can register e-mail destinations in the Address Book.

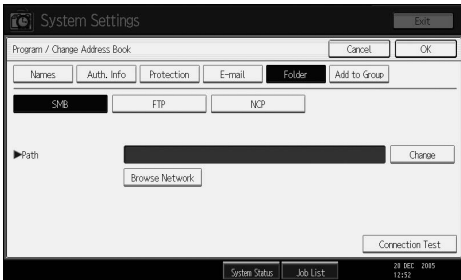

6

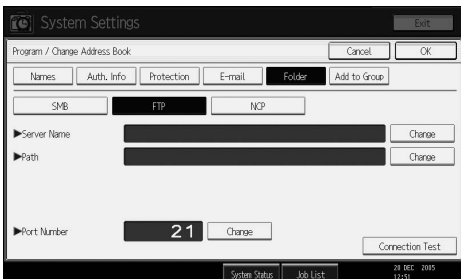

❖ **Folder**

You can register the protocol, path name and server name.

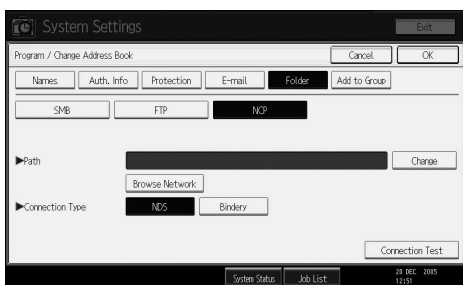

- SMB

- FTP

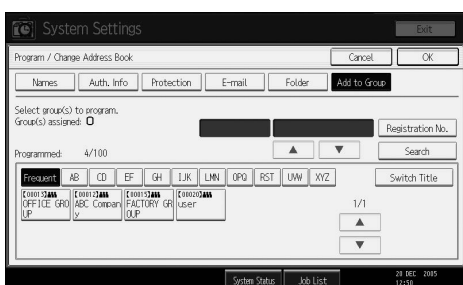

- NCP

❖ Add to Group

You can put registered e-mail and folder destinations into a group for easier management.

Note

- ❑ You can also use a Web Image Monitor to register names in the Address Book. With the SmartDeviceMonitor for Admin, you can register multiple names at the same time.
- ❑ Using **[Address Management Tool]** in SmartDeviceMonitor for Admin, you can backup Address Book data. We recommend backing up data when using the Address Book.
- ❑ For details about using Web Image Monitor, see the Web Image Monitor Help.
- ❑ For operating instructions, see SmartDeviceMonitor for Admin Help.

The licences which components of this software fall under are as follows. First, we will summarize and say that all components are under a BSD licence, or a licence more free than that.

OpenSSH contains no GPL code.

1)

Copyright (c) 1995 Tatu Ylonen <ylo@cs.hut.fi>, Espoo, Finland All rights reserved

As far as I am concerned, the code I have written for this software can be used freely for any purpose. Any derived versions of this software must be clearly marked as such, and if the derived work is incompatible with the protocol description in the RFC file, it must be called by a name other than "ssh" or "Secure Shell".

[Tatu continues]

However, I am not implying to give any licenses to any patents or copyrights held by third parties, and the software includes parts that are not under my direct control. As far as I know, all included source code is used in accordance with the relevant license agreements and can be used freely for any purpose (the GNU license being the most restrictive); see below for details.

[However, none of that term is relevant at this point in time. All of these restrictively licenced software components which he talks about have been removed from OpenSSH, i.e.,

- RSA is no longer included, found in the OpenSSL library
- IDEA is no longer included, its use is deprecated
- DES is now external, in the OpenSSL library
- GMP is no longer used, and instead we call BN code from OpenSSL
- Zlib is now external, in a library
- The make-ssh-known-hosts script is no longer included
- TSS has been removed
- MD5 is now external, in the OpenSSL library
- RC4 support has been replaced with ARC4 support from OpenSSL
- Blowfish is now external, in the OpenSSL library

[The licence continues]

Note that any information and cryptographic algorithms used in this software are publicly available on the Internet and at any major bookstore, scientific library, and patent office worldwide. More information can be found e.g. at "<http://www.cs.hut.fi/crypto>".

The legal status of this program is some combination of all these permissions and restrictions. Use only at your own responsibility. You will be responsible for any legal consequences yourself; I am not making any claims whether possessing or using this is legal or not in your country, and I am not taking any responsibility on your behalf.

BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
